Ghana CanSAT Rocketry Championship (G.C.R.C) 22' - National Campaign

After months of training and preparations, all our **13 teams** are ready to showcase their **experimental satellite (CanSAT)** designs at the **first-ever student satellite design and build** competition in **Ghana**.

Location

The campaign will be hosted by the **Academic City University College** in Accra (Ghana). This event will cover all our ***80 registered participants*** and over **500** people from all over the world. This is a **hybrid event** (online & in-person).

**Academic City University College in
Accra - Ghana**

Overall Mission

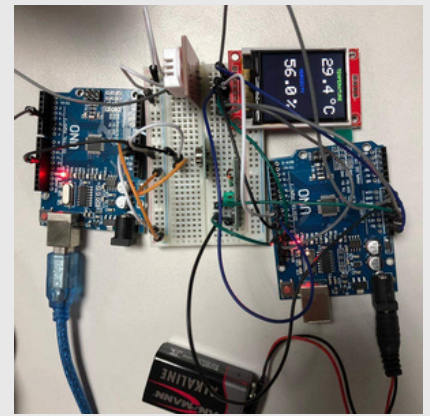

Provide Opportunities and Network for Building & Launching **CanSAT's**/Small Satellites (Pico/Nano Satellites/PocketQube/ UNITYsat) to Low Earth Orbit in a frugal way.

Also, provides opportunities teams to prepare and take part in the **World CanSAT Rocketry Championship (W.C.R.C)** this September in Serbia.

CanSAT Mission

- Launch of CanSat to a minimum height of 50 m and delivery;
- Descending of the CanSat to the ground with a parachute at a certain speed;
- Measurement of air pressure with a pressure sensor in CanSat during descending;
- Temperature measurement with temperature sensor in CanSat during descending;
- Send data via transmitter in the CanSat to the Ground station at least once every three seconds;
- Data analysis.

Teams/ Institutions

KNUST

K.N.U.S.T has more than 60% of the participating teams (9 teams out of 13 registered teams). One of these teams won the Cansat design competition during the cansat mini- contest.
